I really don't understand why this is even an issue and why its become such a deal. I pay for my radio because I don't want to listen to talk and when I want the weather I have a right to have it instantly. why should I have to listen to 20 min of garbage to get my weather and traffic. In passing this law you are telling me that if I want to hear any of the weather and traffic I need to go to another service because you guys are on the take and bent on the distruction of free enterprise. You are un American and should be disband from the face of the earth. and let freedom reign in your place.
